### Objective:

I'm a Frontend Developer who enjoys building clean and responsive websites using HTML, CSS, JavaScript, and Bootstrap. Even while working full-time, I dedicate my free time to improving my frontend skills by building projects and experimenting with new ideas.

I love learning through hands-on development and believe in writing simple, readable code. I want to gain real-world experience through remote or flexible roles and grow into a confident, professional frontend developer.

### Skills:

- Hypertext Markup Language (HTML)
- Cascading Style Sheet (CSS)
- Bootstrap Framework
- Javascript
- Responsive Web Pages

### Demo Projects:

#### 1.Cafe's website

Responsive Cafe website to showcase projects with all components fully functional.

- Technologies: HTML, CSS, JavaScript, Bootstrap  
[Live Demo](#) | Café Landing Page

#### 2. DASH Player

A custom video player that supports streaming formats (DASH/HSL) and local playback (MP4/ WebM /MKV).

- Technologies: HTML, CSS, JavaScript, modern browser APIs  
[Live Demo](#) | DASH Player

#### 3. Character Counter

A responsive, theme-aware Character Counter tool with live text analysis, reading time estimation, and letter density stats.

- Technologies: HTML, CSS, JavaScript, Bootstrap, Fetch API
- [Live Demo](#) | Character Counter tool

All the projects are -
